### Chronic Kidney Disease (CKD)

### Healthy Kansans 2010

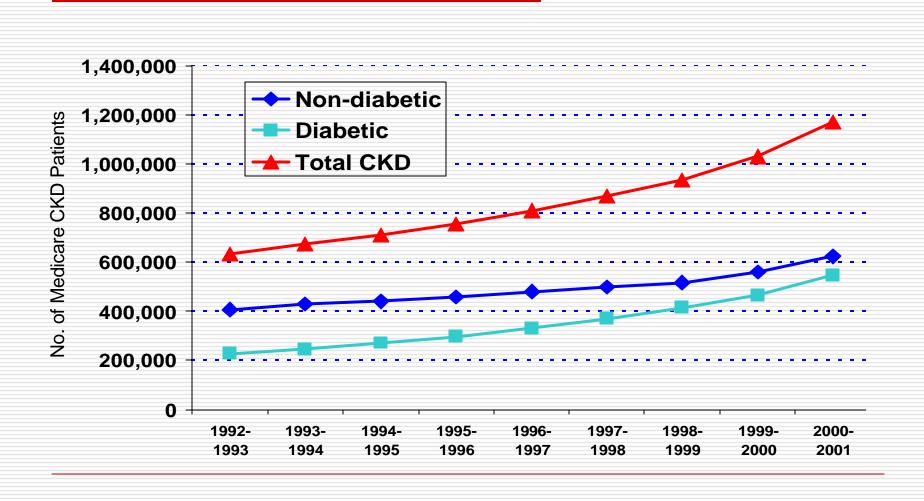

### The Numbers Tell the Story

- 20 Million Americans have chronic kidney disease (CKD)
- 20 Million moreAmericans are at risk of developing CKD
- Kidney disease is the 9<sup>th</sup> leading cause of death

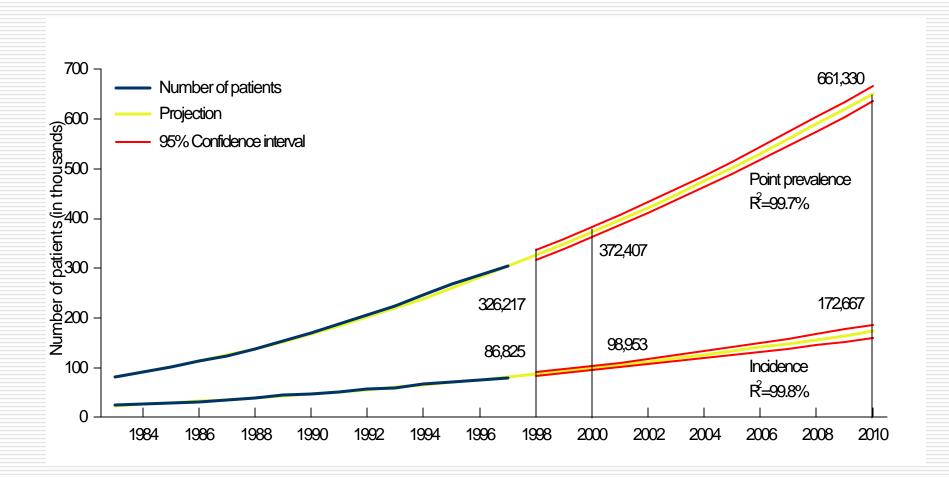

- 400,000 Americans with kidney failure are on dialysis or have a transplant
- 8% more U.S.citizens developkidney failure eachyear

#### Trends in the Medicare CKD population

Total population estimated from the 5% Medicare sample USRDS 2003 Annual Data Report, Figure 1.1

# Projections For The Year 2010: Incident & Point Prevalent ESRD Patients USRDS

### How Do We Stack Up? Incidence Counts (New Patients)

United States		Kansas	
1982	21,886	1982	202
1992	59,431	1992	433
2002	98,900	2002	709

### How Do We Stack Up?

Prevalence Counts (Total Patients)

United States				
USRDS				
1992	204,647			
2002	431,284			

Kansas				
ESRD Network 12				
1992	751			
2002	1,881			

### The Goals of Healthy People 2010 How Close Are We?

#### **Healthy People 2010**

217 per million

**United States** 

Kansas

333 per million

312 per million

### Why the Increase?

Leading Health Indicators	United States	Kansas
Diabetes	6.3%	5.8%
Obesity	30%	22.6%
Hypertension	25.5%	23.3%
Aging population (>65)	12.4%	13.3%

- □ Early Intervention and Prevention Screening Program
  - Identifies risk factors, including diabetes and high blood pressure
  - Target Audience: minority community, underserved or underinsured, anyone with a family history of high blood pressure/diabetes

#### □ Professional Education

- Early Detection, Diagnosis and Management of Kidney Disease booklet
- Annual conference for primary care physicians
- "Lunch & Learn" programs for primary care physicians

#### ☐ Youth Education – KID POWER

Healthy nutrition and physical activity for "tweens" (8-13 year olds)

#### ■ Nutritional Supplement Program

- Target Audience: malnourished people with kidney failure
- Improves functioning and well-being
- Reduces hospitalization and prevents needless deaths

#### □ Public Awareness

- Television, radio, newsprint, outdoor billboard campaigns educate the public about kidney disease
- National Kidney Foundation's U.S. Transplant Games

### What Are Kansas' Assets for Improving This Health Issue?

- NKF staff and renal professionals are committed to public and patient education
- Positive relationships with community and employers offer opportunities for screenings
- Other states' successful state kidney programs are willing to share expertise
- 2001 HB 2059 (K.S.A. 65–1,215) created the Kansas state renal disease fund

## What Are Barriers or Liabilities That Are Limiting Progress in Kansas?

- Lack of healthcare access leads to late nephrologist referral.
- Absence of program in Kansas to combat obesity.
- Lack of patient education regarding options for treatment.

### Recommendations: Fund the State Renal Disease Fund

- Early education for people with CKD to help them make more informed choices
- Premium assistance to increase access to healthcare services
- Medication assistance to reduce complications
- Transportation assistance to get to dialysis
- Help with care costs to reduce the financial and emotional burden of kidney failure

### Recommendations: Fund Screening and Early Education

- Fund a kidney disease screening program to:
  - Identify people at high risk
  - Educate about risk factors
  - Refer to healthcare providers who can treat risk factors early

#### Recommendation: Fund *KID POWER*

- Promotes a healthy lifestyle
- Reduces the incidence of childhood obesity
- Helps prevent high blood pressure, diabetes, and CKD
